

Utility Systems

APPLICATION:

Doble Engineering's M4100 Insulation Analyzer evaluates the integrity of high-voltage substation apparatus by measuring the power factor/tangent delta, in addition to other essential values.

VOLTAGE PERFORMANCE REQUIREMENTS:

12kV DC

SOLUTION:

Assembly: Doble Engineering designed connectors with a double shielded 16 AWG cable with EPR dielectric and polyurethane jacket.

PRODUCTION START DATE AND ASSEMBLIES SHIPPED: 2001/3,500+
